

Histological preparations - General Histology

ORDER SLIDES ACCORDING TO THE LIST

1	slide # 3	stratified squamous epithelium, simple squamous epithelium - cornea
2	slide # 7	dense connective tissue - tendon
3	slide # 8	simple cuboidal epithelium - thyroid gland
4	slide # 9	loose connective tissue - mesentery
5	slide # 10	hyaline cartilage
6	slide # 12	elastic cartilage - epiglottis
7	slide # 13	the wall of intestine
8	slide # 16	compact bone, decalcified
9	slide # 17	intramembranous ossification
10	slide # 18	endochondral ossification - late stage
11	slide # 19	isolated smooth muscle cells
12	slide # 20	cross-striated muscle - tongue
13	slide # 23	cardiac muscle
14	slide # 25	isolated nerve fiber
15	slide # 26	peripheral nerve - impregnated with OsO ₄
16	slide # 27	peripheral nerve
17	slide # 35	section of red bone marrow
18	slide # 35a	smear of bone marrow cells
19	slide # 38	unilocular (yellow) adipose tissue
20	slide # 51a	simple columnar epithelium - jejunum
21	slide # 59	synovial membrane of joint capsule
22	slide # 60	pseudostratified columnar epithelium - trachea
23	slide # 67	stratified epithelium (transitional) - urinary bladder
24	slide # 75	spinal cord
25	slide # 76	spinal ganglion
26	slide # 97	fibroblasts
27	slide # 104	blood film
28	slide # 110	multilocular (brown) adipose tissue
29	slide # 112	nerve cells impregnated with silver nitrate
30	slide # 113	reticular fibers - spleen
